

Professional Business Applications

We are pleased to bring to your attention the complete solution for business management, the intranet application which we called "The Business Manager". This intranet application was developed for the business owner who wishes to have accurate, real time stock and sales reports.

Initially "The Business MANAGER" was developed to offer the solution for restaurant owners — who may own one or more restaurants - of having complete, real time control over their business regardless of what their geographical location is. In time, the project has been further developed to the point where it became fully suitable for stores, warehouses or any other similar business kinds.

"The Business Manager" intranet application was developed to suit all needs, independently of the size of your business, number of your restaurants or stores, number of employees or number of available products. Helped by this intranet application you'll be able to check, in real time, the situation of your main inventory, the inventory of your different restaurants and/or stores, the amount of money you've spent on your total inventory or on the inventory in one certain unit (restaurant and/or store). You will also be able to check the total sales, the sales in one of your restaurants, sales made by one of your employees, and the list is still wide opened. All this and many more business management possibilities will be just one click away.

More information regarding "The Business Manager" can be found on the web site of the inventory control & POS software [Web templates](#)

Web templates are ready-made web design products that can be used as a basis for high-quality web design. It is the perfect solution (and the less expensive one) especially for the web developers who don't want to deal with design and prefer to save time for programming.

Our free web templates page is under construction at the moment. You'll be able to download free templates within days from now (2006-11-29).

If you plan to have a cutting-edge, eye-catching web site made up of professional web pages, you can go for the premium web template. Our collection is growing rapidly so be sure to check back often for more templates.
